

PROTECT YOURSELF

 **INDIVIDUAL VIRUS PROTECTION FOR
YOU AND YOUR OCULAR!**

Further information available on our
website www.hektros.com

Ensure virus protection for yourself and your microscope oculars with our specially designed covers. They shield against contamination and protect the sensitive surfaces of your microscope.

Regular cleaning can scratch and blind the glass, but our covers prevent such damage, preserving clarity and quality. Made from durable TPE-black 95ShoreA and scratch-resistant polycarbonate, they fit oculars with a diameter of less than 54 mm.

Maintain optimal viewing conditions with our high-quality protective covers.

Perfectly fit

ViPro fits perfectly with oculars having a diameter of less than 54mm

Protection

The Lens and Body Protects
You and your oculars from
microorganism and scratches

Connectable

Its modular design is perfectly
suited for use with mono- or
binocular microscopes.
