

TIPCUBE

FULLY AUTOMATED PIPETTE TIP FILLING MACHINE

Save money

Save time

Less waste

The TipCube is a compact pipette tip filling machine that can quickly and efficiently fill pipette tips from through its innovative patented technology.

The TipCube is compatible with the most commonly used pipette tips of all brands and volumes, ranging from 0.1µl to 300µl.

Laboratories can reduce their plastic waste by using bulk pipette tips and the reusable tipboxes.

LET THE MACHINE DO A MACHINE'S JOB

The TipCube takes care of the tedious task of filling pipette tips, freeing up your employees to focus on their core responsibilities. With the TipCube, your team can concentrate on their actual work while the machine efficiently handles the filling process. This not only enhances productivity but also ensures that valuable time and effort are directed towards meaningful tasks, instead of mundanely filling boxes.

The **TIPCUBE** offers an easy and intuitive operation. Its user-friendly design includes a software interface that explains how to easily operate it. With a setup time of under 2 minutes, it ensures quick and efficient usage. Additionally, the TipCube can fill 24 boxes per hour. With a drum capacity of over 1000 tips it is a highly productive and reliable solution.

The supplied **TIPBOXES** from Hektros have a capacity of 0.1 to 300µl and are available in red, yellow, and personalized colors. If you choose not to use our boxes, we will provide you with the appropriate adapter.
